Hi I'm Sabbir Hassan, 26 years old, single male, a self thought developer and designer. I have started my journey as a developer in 2019, Nice to meet you, Hope we can get along 😊

Development Skills

● Backend

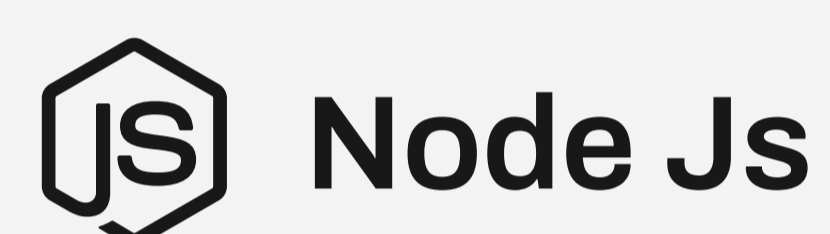

Rust

Professional, 4⁺ Years of experience

Zig

Intermediate, 2.5⁺ Years of experience

Node Js

Professional, 1.5⁺ Years of experience

C++

Intermediate, 3⁺ Years of experience

I have worked with higher level language like NodeJS and lower level language like C++, and in between like Rust or Zig, My Personal preference and all time favourite is Rust and that's what I am best at

● Frontend

Flutter

Professional, 4⁺ Years of experience

Tauri

Professional, 3⁺ Years of experience

Vanilla HTML & CSS

Professional, 6⁺ Years of experience

Javascript

Professional, 6⁺ Years of experience

For Android or Desktop app I use flutter or tauri, for webpages I prefer using vanilla html & css and web component over 3rd party api like React or Vue js

● Database Management

MongoDB

Professional, 4⁺ Years of experience

ScyllaDB

Beginner, 4⁺ Months of experience

MySQL

Professional, 3⁺ Years of experience

SQLite

Professional, 3⁺ Years of experience

Redis

Intermediate, 3⁺ Years of experience

Most of my works gets done using MongoDB and SQLite, I rarely use MySQL, I use Redis database only to store session data of for immediate access and I don't use ScyllaDB in any project yet but thinking about shifting to Scylla from Mongo

Designing Skills

Xd Adobe XD

Professional, 3⁺ Years of experience

Figma

Professional, 3⁺ Years of experience

Ai Adobe Illustrator

Intermediate, 1.5⁺ Years of experience

Pr Adobe Premiere Pro

Beginner, 3⁺ Years of experience

Ps Adobe Photoshop

Intermediate, 3⁺ Years of experience

I don't consider myself a professional designer, but I know enough to get the job done in case my team doesn't have a designer temporarily

Management Skills

● 2021 - April 2025

I had worked on my own startup company for about 3 years where I have been a full stack developer and the project manager for almost all of the projects, even though it was only a startup company I had some handful of satisfied customer. So I consider myself confident enough to manage big projects and make sure the clients are satisfied

● May 2025 - Feb 2026

Started Working as Team Leader at JoinVentureAI, managed a team of ~20 members for about 9 months.

● March 2026 - Present

Started working on my new position as Operation Manager for 3 teams.

Others Skills / Hobby

● Script writing

I like to read Japanese manga on my free time, and that's where I got my inspiration to write stories and draw them, I didn't get to be a writer or artist but nevertheless sketching sometimes does help to become a better designer and writing complicated story does help with becoming better at solving complicated algorithms because both of the work needs a cool mind

● Sketching

Previous Experiences

I have been working on **Bitlaab** for about 3 years as an full stack developer and the project manager

 bitlaab • <https://bitlaab.com>

Throughout these years I honed my skill on all kinds of challenge and gathered the expertise on all of the things I mentioned before

Hare are some of the projects I have worked on :

Lusve

• <https://lusve.com>

Health Master BD

• <https://healthmasterbd.com>

Romatoo

• <https://play.google.com/store/apps/details?id=com.fahimshahariar.romatoo>

Hearts Medi Study

• <https://heartsmedistudy.com>

Master The Ward

• https://play.google.com/store/apps/details?id=com.heartsmedistudy.master_the_ward

AKMDC Banani

• <https://akmdcbanani.com>

I have worked on more projects that I cannot share in my CV due to client confidentiality or simply because the client is no longer using those services

Open Source

Fanari

• https://github.com/SabbirMurad/fanari_v2

An open source social media app I am working on, the goal of the project is to get as much performance and efficiency as top level social media apps like facebook and instagram

Frame Forge

• https://github.com/SabbirMurad/frame_forge

An open source design tool I am working on, the goal is make it developer friendly and generate as much as frontend code from it without writing any myself.
